

AMERICAN SOCIETY OF CIVIL ENGINEERS
LOS ANGELES SECTION
STRATEGIC PLAN
2001

INTRODUCTION

The Los Angeles Section of the American Society of Civil Engineers (ASCE) is comprised of approximately 7000 Civil Engineers, organized into 7 Branches, who serve a population of over 15 million people.

In order to focus on those things that are most important to the Civil Engineering Profession and in turn what the Civil Engineering Profession can best contribute to the people we serve, this Strategic Plan was prepared.

SUMMARY

This Plan has 5 major goals:

1. Develop Leadership to broaden our members' perspectives and to enhance their Career growth.
2. Advance Technology to enhance quality, knowledge, competitiveness, and environmental stewardship.
3. Advocate Lifelong Learning to aid our members continued growth throughout their careers.
4. Promote the profession throughout society to enhance its stature and influence public policy.
5. Assure effective internal Section communications.

There are 29 Action Items of which 13 either continue or enhance existing Section/Branch activities and 16 provide new focus.

This Plan addresses 3 critical organizational issues of LEADERSHIP, PUBLIC POLICY, and PUBLIC RELATIONS that are essential to our Profession being able to be a major contributor to the future of our cities and State.

It has identified three major challenges facing our State now and in the foreseeable future: ENERGY, WATER, and SUSTAINABLE DEVELOPMENT. The Civil Engineering Profession needs to play a significant role in developing and carrying out short and long term solutions to these challenges.

**ASCE - LOS ANGELES SECTION
STRATEGIC PLAN 2001
(Approved – 5/2/01)**

<i>GOAL #5 Assure effective internal Section communications</i>
