Outstanding Younger Civil Engineer

Jamie E. Hutchins, P.E, M.ASCE
Santa Barbara/Ventura Counties YMF

Jaime Hutchins is a graduate of Rensselaer Polytechnic Institute (2004) with a B.S. in Civil Engineering. She became a California Registered Professional Engineer in 2008 and became LEED AP certified in May 2009.

Jamie began her career at TRC Lowney where she gained experience in all phases of geotechnical engineering from design through construction, resulting in a very well-rounded young engineer. She started as a laboratory and engineering field technician, which provided an excellent foundation for the design and project management responsibilities that she was given as her career evolved. Jamie is currently employed at Fugro West and is a three-time winner of Fugro's Quality Improvement Program suggestion of the month.

She is an active member and Secretary of the SB/V YMF, has written several articles for their newsletter, and has organized technical tours of local engineering projects. In addition, she is an active recruiter and promoter of the engineering profession through community outreach programs such as the Ventura County Annual Science Fair and Ventura High School "Segue" Program.

"Ms. Hutchins strives to be an exemplary member of the young engineering community through her work ethic, project commitment, and involvement in local engineering societies. Her skills proved to be invaluable. As the County's project manager for this project, it has been extremely gratifying and a great pleasure working with her this past year. Ms. Hutchins is one of the finest young engineers I have had the privilege to work with. . . ."

Christopher E. Cooper
Engineering Manager III
County of Ventura
